

Skylotec goes to Africa

The SKYLOTEC Textile Collection 2011

Africa is the embodiment of freedom and diversity. Africa means towering mountain ranges, steppes stretching across the horizon as far as the eye can see and tropical rainforests. The life forms of this secretive continent have learned to adapt to different climate conditions and react flexibly to change. They are at one with nature.

The SKYLOTEC 2011 textile collection embodies this spirit and is presenting light, sporty textiles made of cotton and blended fabrics for natural wear comfort and pure freedom of movement.

“SKYLOTEC goes to Africa” – is inspired by the people, the colours and the aromas and spices of Marrakesh, SKYLOTEC’s clothing is designed for climbers and boulderers interested in the finer things in life.

Back to basics!

The 2011 collection includes T-shirts, longsleeves, hoodies and shorts and pants for men and women. Eye-catching motifs typical of the region are also featured in the designs. An exotic note is provided by the warm colours of Morocco’s deserts and cliffs. The use of high-quality, functional and lightweight materials guarantee optimal wear comfort and outstanding fit.

Maroc Shirt

An ingenious 2-in-1 shirt that can either be worn together or as a separate T-shirt or singlet in a warm earthy red, reminiscent of the Todra Gorge in the remote High Atlas Mountains near Marrakesh.
